

Engineered for Safety!

Pentalift loading dock guide lights

Pentalift loading dock guide lights provide visible assistance for truck / trailer approaches in environments where the lighting levels are low. The clear target provided by the loading dock guide light avoids damage to the building, trucks and trailers and improves safety and efficiency at the loading dock.

Pentalift loading dock guide light design features:

- LED lights provide low power consumption, reliable long life and low voltage operation.
- Aluminum main channel facilitates easy installation and maintains aesthetics for life of product.
- Very low power consumption, 110 volt wall plug to 12 volt operation simplifies electrical connection requirements and supply.

Pentalift loading dock guide light benefits:

- Provides illuminated “target” for approaching truck / trailers in darkened environments.
- Eliminates or minimizes damage to the facility and truck / trailers due to off target approaches to the facility.
- Increases efficiency by improving approaches to the facility.

Note: Some photos may reflect products with optional features. All Pentalift Equipment products are subject to design improvement through modification without notice.
