

Engineered for Safety!

Mechanical Edge of Dock Leveler

Description:

The Pentalift mechanical edge of dock leveler is easily lifted with its activating lever. This results in a low effort to activate the edge of dock. A torsion spring assembly provides operator assistance when cycling of the leveler is required. The simple design ensures trouble-free operation. Lip hinge grease fittings are installed for easy of maintenance.

Specifications:

Mechanical edge of dock(s) to be Pentalift model EDML_____, as manufactured by Pentalift Equipment Corporation. The nominal deck size will be _____" wide a rated capacity of _____ lb. Edge of dock(s) will be mounted to the face of the dock. Edge of dock(s) will be operated by the easy lifting activating lever with torsion spring assistance. The nominal lip length will be 15". The lip hinge will be full width piano style with a full width hinge pin. The lip plate will be made from high tensile steel construction and be designed to project 11 1/2" beyond the face of the dock bumpers. After the truck / trailer departs, edge of dock(s) will automatically return to the stored position. Edge of dock(s) will be equipped with a lip extension latch to ensure the lip is extended fully. When not in use, the activating lever will store safely at the side of the deck. Two molded rubber bumpers and two steel bumper blocks will be provided to achieve an overall projection of 16". Edge of dock(s) to have Pentalift gray finish.
