

PENTALIFT EQUIPMENT CORPORATION

Engineered For Safety !

Application Designed: High Travel Double Scissor Lift Table

A music hall required a hydraulic lift with a platform size of 8' wide, 15' long and 15' of vertical travel to assist in their musical productions. Pentalift engineered and manufactured a custom lift to suit the specific application requirements. The lift table shown is equipped with a remote 10 horse power unit to comply with the speed requirements and is also equipped with both upper and lower limit switches to signal the platform position. The platform is outfitted with 12 ultra light aluminum "pocket style" guard rails for quick ease of removal and positioning. Each section of guard rail is 6' high and manufactured with an expanded mesh covering for increased safety.
