

## **PENTALIFT Releases New Loading Dock Leveler Catalog**

Guelph, Ontario: April 30, 2007:

Pentalift Equipment Corporation of Guelph, Ontario has recently released their four color catalog on their Vertical Storing Dock Leveler™. The Vertical Storing Dock Leveler has been uniquely designed for safety, cleanliness, security convenience and energy savings all in a single design.

This model has been specially engineered for applications where environmental control is a key requirement. They are ideally suited for application such as refrigerated warehouses, food processing facilities, and facilities requiring high security.

In addition, this unique Vertical Storing Dock leveler design offers customers additional benefits; stopping forklifts from accidentally driving off the loading dock, eliminating loading dock door damage and providing a safe easy clean pit design.

Pentalift's efficient 120,000 square foot manufacturing facility permits rapid custom fabrication for a complete line of loading dock levelers, trailer restraints, dock seals and elevating docks to accommodate most loading applications at competitive prices.
