

PENTALIFT EQUIPMENT CORPORATION

Engineered For Safety

Application Designed: Galvanized Double Scissor Lift Table

A manufacturer of breakfast cereals contacted Pentalift to discuss a solution for an ongoing wash down application. After the batch mixing process was completed the stainless steel containers were washed and sterilized prior to reuse. A Pentalift 2,500 lb capacity double scissor hydraulic lift table was selected to assist in the cleaning process. Featuring 79" of vertical travel this model was chosen to provide maximum access as the containers are raised and lowered. The galvanized finish ensures structural longevity in this demanding application.
