

PENTALIFT EQUIPMENT CORPORATION

Engineered For Safety !

Application Designed: Pentalift HD7835 Hydraulic Dock Levelers, HFR32 Vehicle Restraints and PSI 550 Inflatable/Retractable Dock Shelter are utilized at one of North America's Home Improvement Chain Distribution Centres.

One of North America's home improvement chains awarded Pentalift the contract to supply and install 30 Pentalift HD7835 hydraulic dock levelers, 30 Pentalift HFR32 Vehicle Restraints and 30 Pentalift PSI 550 inflatable dock shelters for their distribution center. After extensive industry research this home improvement chain selected Pentalift for their distribution facility over their retail store dock leveler supplier. This particular company required reliable, durable and most importantly safe equipment that would stand up to the rigorous demands of a high volume distribution center. Having the Pentalift HFR32 in place at this facility, not only does it restrain the trailer in the dock area to deter early departure but it is also interlocked to the hydraulic dock leveler to prevent the use of the dock leveler unless the restraint is engaged to the "RIG" bar of the trailer to further increase the level of safety.
