

PENTALIFT EQUIPMENT CORPORATION

Engineered For Safety

Application Designed: 60 Pentalift Model HD6840 Hydraulic Dock Levelers, 60 Pentalift Model PS200A Dock Seals

In a very busy and growing Industrial Park customers were having difficulty finding a suitable location for their distribution centers. This specific Industrial Park has good access to a number of major highways which makes the Industrial Park all the more desirable. Developers recognized the need to have an inventory of readily available warehousing space available for quick possession so a number of distribution centers were built on spec. Many of these buildings feature Pentalift loading dock equipment as the contractor was looking for a quality product at a competitive price. This specific facility features 60 Pentalift fully hydraulic 6' wide, 8' long 40,000 lb capacity dock levelers and 60 Pentalift PS200A dock seals to suit 9' wide, 10' high overhead doors. At the time the dock equipment was installed there were no interior walls allowing flexibility of available floor space as the facility is leased. This facility may have a single tenant or can be easily sub divided to suit the customers required floor space and loading dock requirements.
