

## Engineered For Safety

### Application Designed: Steel Processing Custom Lift Table

A steel processing company requested assistance in designing a custom lift table to suit their application. The steel to be handled arrived in 3 lengths; 8' long, 16' long and 24' long. The lift table was designed with 3 leg sets under a common platform providing support directly under each of these 3 lengths of steel. The platform size is 10' wide, 24' long; the vertical lift is 6' and the lift has an overall capacity rating of 40,000 lbs. The lift table is equipped with a hydraulic velocity fuse and both a bottom position and top position field adjustable limit switch for precise, repetitive positioning.
