Engineered For Safety !

Application Designed: Mobile Television Broadcast Studio

A National Television Network that broadcasts one half of the NASCAR Cup Series required a portable Broadcast Studio to move from event to event. Pentalift engineered and manufactured an application designed tandem (dual leg set for improved stability) hydraulic lift table to safely raise and lower the broadcast studio during the weekend's events. The chosen design incorporates a 40,000 lb capacity hydraulic lift table installed on a "flat bed" trailer. The unit was supplied with an on board 3 phase power unit that connects to the "on site" electrical service to provide operation.
