

PENTALIFT EQUIPMENT CORPORATION

Application Designed: Power Drive High Cycle Lift Table

Photographed is 1 of 4 Hydraulic Lift Tables designed and built for a manufacturer of “Pre-Fab” Freezer Warehouses. In addition to raising and lowering 10,000 lbs, the lift table is power driven laterally on a floor installed track system. The Lift Table platform size is 5’ wide x 60’ long, the unit raises the 10,000 lb load in excess of 12’. The Lift Tables are a key component of the AS/RS System (Automated Storage/Retrieval System) used within the facility to transfer and position Freezer wall panels during the manufacturing process. The Lift Tables feature a High Cycle Operating Package, a Central Lubrication System and a 2 speed (soft start) Power Drive system to assure smooth product transfer.
