

## Loading Dock Equipment

With over 25 years of experience manufacturing quality loading dock equipment, Pentalift is your single-source supplier for loading dock levelers, dock lifts, dock seals & shelters, vehicle restraints, and much more.

## Engineered for Safety

# Pentalift Equipment Corporation

Pentalift is able to meet all of your needs with a wide variety of dock levelers, vehicle restraints, dock seals and shelters and other integrated loading dock safety products. Engineering excellence, manufacturing quality, and built-in safety features make Pentalift the smart choice.

## Hydraulic dock levelers

Pentalift hydraulic dock levelers provide superior value through prolonged, trouble-free performance. They are designed to provide the highest level of safety through automatic push button operation. The Pentalogic hydraulic manifold revolutionized hydraulic control circuitry by eliminating multiple valve assemblies, which can cause on-site adjustments, oil leaks, and hydraulic component failure. Pentalift dock levelers are designed to provide reliability, safety and performance. Use the following link to go to the dock leveler page on the internet. ## Mechanical dock levelers

Pentalift mechanical dock levelers are designed to meet the needs of today's loading docks. They are semi-automatic and require no manual lifting. A simple pull chain, positioned at the rear of the deck, engages and releases the dock. The patented easy float hold down and posilock lip operator make this the safest mechanical leveler available. The easy float brake band lets the deck assembly float with the trailer while in use. Use the following link to go to the dock leveler page on the internet. Pentalift Mechanical Dock Levelers

## Vertical storing dock levelers

Pentalift offers hydraulically operated vertical storing dock levelers when safety, cleanliness, security, and energy savings are required in one design. This style of leveler is ideally suited for cold storage, food processing and pharmaceutical operations. Featuring a powered up and down hydraulic system which stores in a safe, over centered position. Use the following link to go to the dock leveler page on the internet. Pentalift Vertical Storing Dock Levelers

# Vehicle restraint systems

Pentalift offers a wide range of mechanical and automatic vehicle restraint systems designed to improve safety and prevent accidents at the loading docks. The cost of an industrial accident at the loading dock can easily exceed \$1,000,000 and result in increased insurance cost. A range of models allow you to select the proper solution for your application. All models have light and sign systems available to improve the communication between the dock attendant and the driver. All safety conscious facilities should incorporate vehicle restraints. Use the following link to go to the vehicle restraint page on the internet. [www.pentalift.com/vehicle-restraints.htm](http://www.pentalift.com/vehicle-restraints.htm)

# Dock seals and shelters

Pentalift manufactures a complete range of foam and air inflatable dock seals as well as rigid, flexible and air inflatable dock shelters. All products are designed to improve safety, protect merchandise, reduce energy cost and improve security at the loading dock. The wide range of fabric materials, configurations and options allow you to build the best solution for your application. Use the following link to go to the dock seal and shelter page on the internet. [www.pentalift.com/dock-seals-dock-shelters.htm](http://www.pentalift.com/dock-seals-dock-shelters.htm)

PS-200 Dock Seal

PS-400 Dock Shelter

# Dock lifts

Dock lifts are an excellent means of simplifying loading functions and creating safer working conditions where loading docks don't exist or in conjunction with dock levelers to provide greater flexibility for a busy loading dock. Pentalift pit-mounted and low-profile surface mounted dock lifts provide an increased service range eliminating the potential for unsafe loading operations due to severe height differences between ground level and the truck's trailer bed. Safer and more efficient than loading by ramp or by hand. Use the following link to go to the dock lift page on the internet.
