

# Pentalift Model PSI400 Inflatable Rigid Dock Shelter

Designed for door openings 12' wide x 12' high or lower

## Features:

- Peaked head frame to accommodate rain run off
- Inflatable head bag to provide optimal top sealing on a wide variety of trailers
- Fiberglass stays provided in side curtains facilitate proper seal of side curtains against trailer
- 42" head bag drop as standard
- 24" wide side curtain as standard
- 18" - 24" - 30" shelter frame projection(s) as standard
- Wooden frame construction 100% pressure treated.
- Translucent panels cover the head frame and side frames providing improved illumination during loading / unloading
- Aluminum trim maintains building aesthetics
- 4" wide x 24" high yellow guide stripes assist with proper vehicle positioning
- Bottom cushions provide a draft seal between side curtains and the building wall at dock height
- Structural steel protective guards protect shelter side frames
- Plated fasteners and hardware maintains building aesthetics
- Completely assembled 1/2 hp 115 motor/blower for head bag
- On/Off activation switch with overload protection

## Options:

- Extra head bag drop of up to 14" to seal lower profile trailers.
- Trailer door hinge gap seal: Closes off the gap between open barn style door and the sides of the trailer.
- Full height yellow guide stripes: Provide improved visual guidance for positioning trailers.
- Higher or lower side frames for distinct door heights
- Wider or narrower head frame and bag to suit specific door widths
- Extended projection head frame and side frames for different dock applications that require deeper bumper depth
- Interlocking to dock equipment and lights: Facilitates and forces correct process sequences.
